

# Titanic Dataset - EDA Report (Limited Dataset)

This Exploratory Data Analysis (EDA) is based on a limited Titanic dataset containing only two columns: PassengerId and Survived. Although the dataset is incomplete, meaningful insights about survival distribution are extracted.

***Survival Count (0 = Not Survived, 1 = Survived)***

***PassengerId vs Survival Scatter Plot***

**Key Insights:**

- Dataset contains only 2 columns: PassengerId and Survived.
- The survival count plot shows how many survived vs died.
- PassengerId does not influence survival, but helps visualize distribution.
- Overall survival rate: 36.36%
- For deeper analysis, more columns like Age, Sex, Fare, and Pclass are required.
